Hent dispenserings pakkegrundlag

Service anvendes til at hente det pakkegrundlags-format, for en given dispenseringsperiode, som bruges til pakkemaskinerne på apoteket.

Servicen erstatter </DetailedSpecification> på FMKs 1.4.X snitflade, som hentes igennem Hent dosisdispenseringskort service på den pågældende snitflade.

Det har dog vist sig igennem årende at dataen er rigtig tung XML-mæssigt, og der var ikke nogen måde at filtrere på hvilke perioder man ønskede grundlaget for, derfor kunne man i nogle scenarier ende ud med så meget XML at det tog lang tid både at formulere for FMK, men også at udrede hos apotekerne. Derudover blev det ofte hentet uden grund, hvilket ligger endnu mere pres på FMK, hvilket ikke var optimalt for den allerede tungeste service FMK har.

Derfor flyttes funktionaliteten ud i sin egen service, hvor man henter for 1 dispenseringsperiode af gangen, og kun får et svar tilbage for denne periode.

Forespørgsel

Request

Til at starte med angives **PersonIdentifier** eller **OrganisationIdentifier** på den person/organisation som kortet er tilknyttet. **PersonIdentifier** anvendes for normale dispenseringskort til borgere, **OrganisationIdentifier** anvendes for dispenseringskort til organisationer.

Herefter udfyldes **DispensingCardIdentifier** med ID'et på det dispenseringskort som forespørgslen omhandler, efterfulgt at **DispensingPeriodIdentifier** med ID'et på den dispenseringsperiode som man skal have et pakkegrundlag for.

Forvent at FMK validere på sammenhæng mellem Person/Organisation, dispenseringskort og dispenseringsperiod

</GetDispensingDetailedSpecificationRequest>
```

Svar

Response

I svar fra service kommer først **PersonIdentifier** eller **OrganisationIdentifier** tilbage som angivet i forespørgslen, herudover også **DispensingCardIdentifier** og **DispensingPeriodIdentifier**.

StartDate og **EndDate** er de næste elementer som angiver start og slutdato for en pågældende dispenseringsperiode.

Herefter kommer en række Dispensering elementer som set fra dispenseringskortet. Bemærk at denne service ikke som udgangspunkt returnere nogen **Warning**-elementer, Warnings er tiltænkt når kortet/perioden hentes i sin helhed, og har ikke nogen relevans i denne service som kun skal benyttes til at danne pakkegrundlaget til de maskiner som fysisk pakker perioderne.

Herefter kommer en række **DispensableUnit** elementer, disse elementer beskriver den enkelte "pose" set fra FMK's synspunkt af ud fra alle de dispenseringener der er i perioden.

Hvert **DispensableUnit** elementer indeholder følgende:

- **Date** Dato for denne pose fx "2026-07-01"
- **Time** Tidspunktet for denne pose "morning"
- Optionelt: **SequenceNumber**, sekvensnummeret for posen, bruges bl.a. hvis der findes mere end 1 pose på samme Time
- Optionelt: en række **AdministrationInstruction** elementer, med indtagelsesinstruktion for en eller flere af lægemidlerne i denne periode, tages fra de enkelte dispenseringer i posen.
- Optionelt: **IsPRN**-markering, udpeger at medicinen i denne pose er "efter behov".
- En række **MedicationRef** elementer, som udpeger hvilken medicin og mængde.

MedicationRef elementerne indeholder:

- **MedicationIdentifier** ID'er på den pågældende **Dispensering** som pakkes i denne pose (i 1.4.6 var det PlannedDispensing der blev refereret til).
- **Quantity** mængden af enheder som skal i denne pose.
