Anvendelse af nationale roller via SEB

FMK's sikkerhedsmodel er baseret på anvendelse af ID Kort, signeret af SOSI STS'en. Inden dette kan ske, skal brugerens identitet kontrolleres vha. en IdP, som STS'en har tillid til. Det kan enten være en lokal IdP, NemLogin eller SEB (Statens Elektroniske Brugerstyring). I relation til SEB, er der i FMK oprettet en whitelist af godkendte SEB-roller, som FMK accepterer og som er koblet til en tilsvarende FMK-rolle, som angivet i RequestedRole i whitelisting headeren (se [Sikkerhedsmodel](#)):

SEB Rolle	FMK rolle
urn:dk:healthcare:national-federation-role:code:41003:value:PlejeAssR3	Plejhjemsassistent

Herunder ses et eksempel på et RequestServiceToken kald til STS'en, hvor der anvendes en national rolle, som STS'en validerer brugerens identitet op mod:

```
